01-18 In wall doors series AE500

19-30 Full frame doors series AE700

31-42 Standard framed doors series AE900

In wall doors

AE 500

The aluminum built-in wall frame allows the door to be fitted well in the wall.

Created with individual design of the wing, a solution that reflects the wide range of panels and colors – mirror, veneer, glass, HPL and more.

The system allows the application of visible and concealed door hinges.

The hidden-effect door is achieved by using identical material for the wing panel and wall paneling.

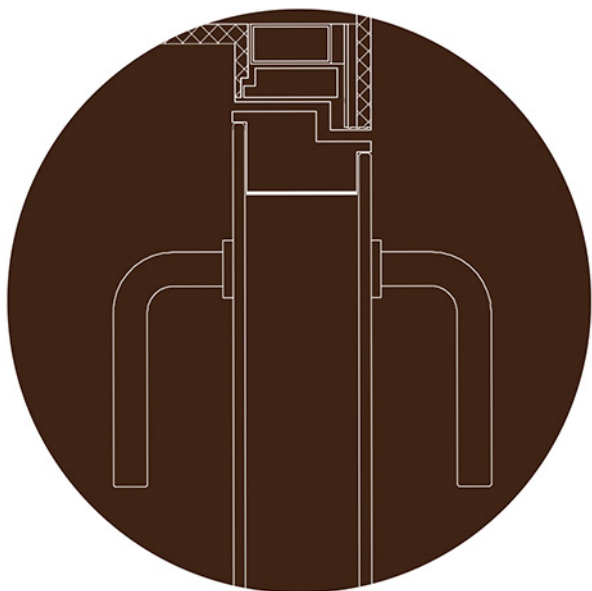

AE 520 Mirror

Increase and illuminate the interior space

AE 510 natural veneer dark
oak / wenge
The tree in the interior - synonym of
warmth, comfort and coziness

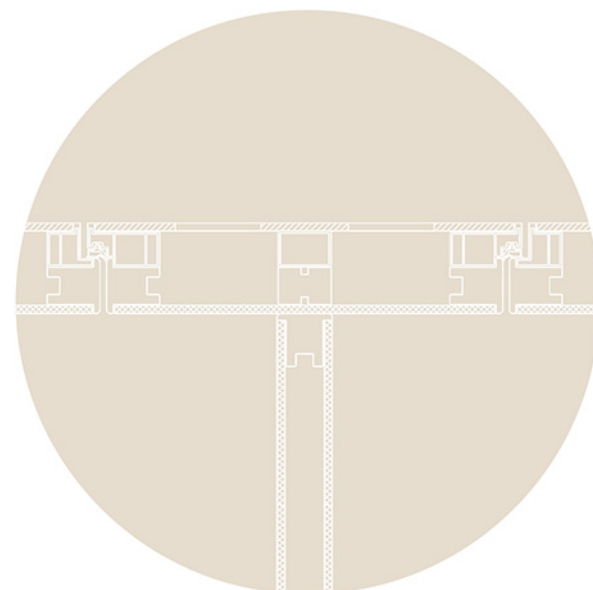

AE 520 Frosted glass

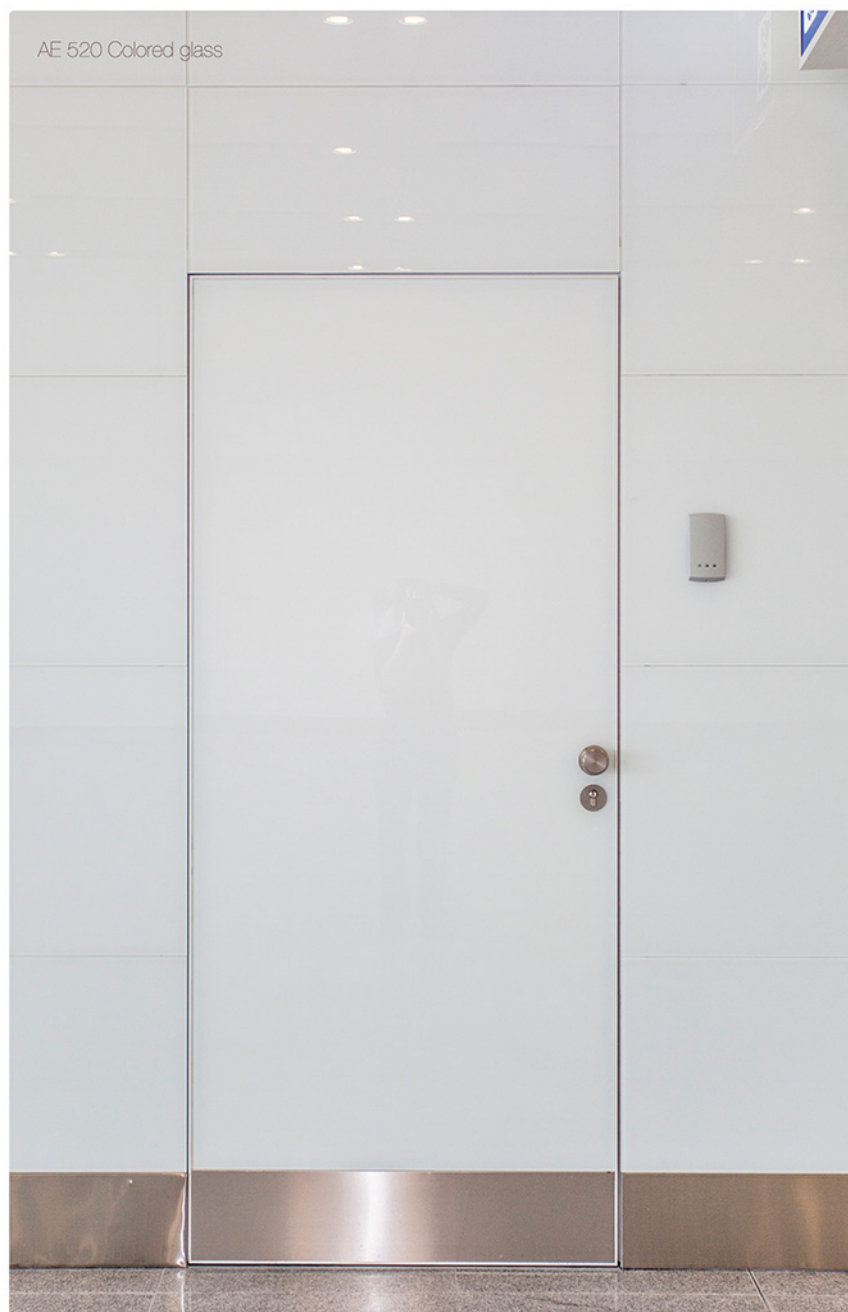

AE 520 Frosted glass
Translucence in the interior

AE 520 Clear glass
Full transparency in the room

AE 510 HPL color – white,
glossy surface

Full frame doors

AE 700

Visible and stylish aluminum frame, embedding the sill into the wall. Suitable option to reflect the visibility of the door in the interior.

Stylishly designed door wings and a wide range of panels, specified in material and color.

The system allows application of visible or hidden placed hinges.

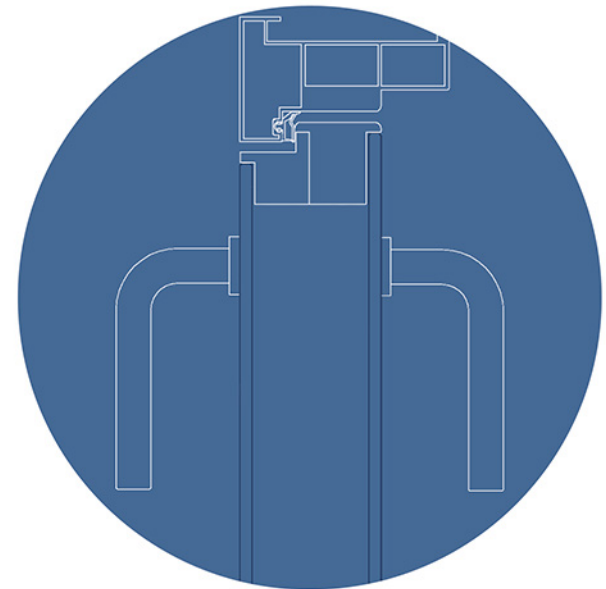

AE 710 HPL

AE 710 H

Standard framed doors

AE 900

The door installation is optional as long as the rough opening width/length is verified with the door frame size.

Without Sill Frame.

To apply different finishing materials to the framed doors on the walls as adjusting panels, stone finishing and other.

Stylishly – designed door wings and a wide range of panels, specified in material and color.

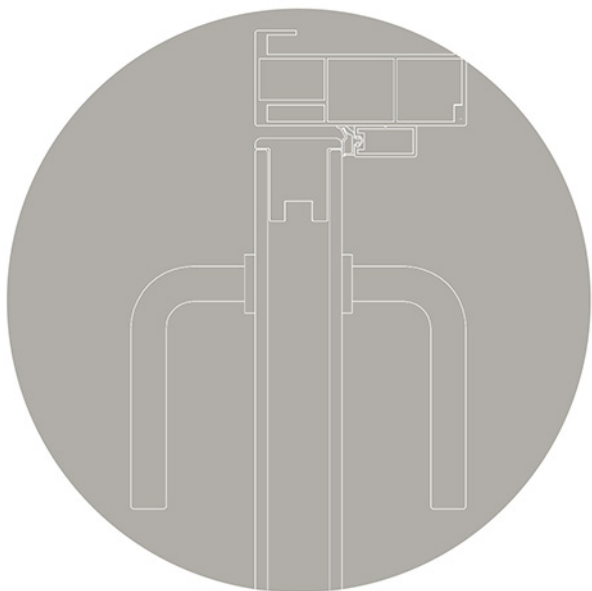

The system allows application of visible or hidden placed hinges.
